EXHIBIT B**

1. DESCRIPTION OF ACTIVITIES

A. Existing Conditions

The North Wetland Complex (NWC) is a 32-acre area of land along the Snohomish River in the City of Everett. The NWC is part of the 221-acre Riverfront Development Site, for which the City is responsible for public amenities, including wetland enhancements. At present, Bigelow Creek, which is not on state-owned aquatic lands (SOAL) is the only existing channel connecting the Snohomish River and the wetland.

Improvements currently located on SOAL consist of approximately 100 abandoned creosote-treated pilings, and additional beams from a derelict railroad trestle. These items are along the western bank of the Snohomish River adjacent to the NWC.

B. Proposed Conditions.

The City of Everett is proposing to restore tidally influenced wetland habitat within the Snohomish River by creating two new breaches into the NWC; excavating three new channels within the NWC; and connecting two of the channels together.

Activities on SOAL include the following:

- (1) Excavation of two breaches (Breach 1 and Breach 2) along the western bank of the river, which will remove 500 cubic yards of material; and
- (2) Removal of derelict creosote-treated piles and railroad trestle beams, as follows:

LOCATION	NO. PILES	NO. BEAMS
BREACH 1	Undetermined (not visible above the water line)	0
BREACH 2	45	4
EXISTING CHANNEL	15	0

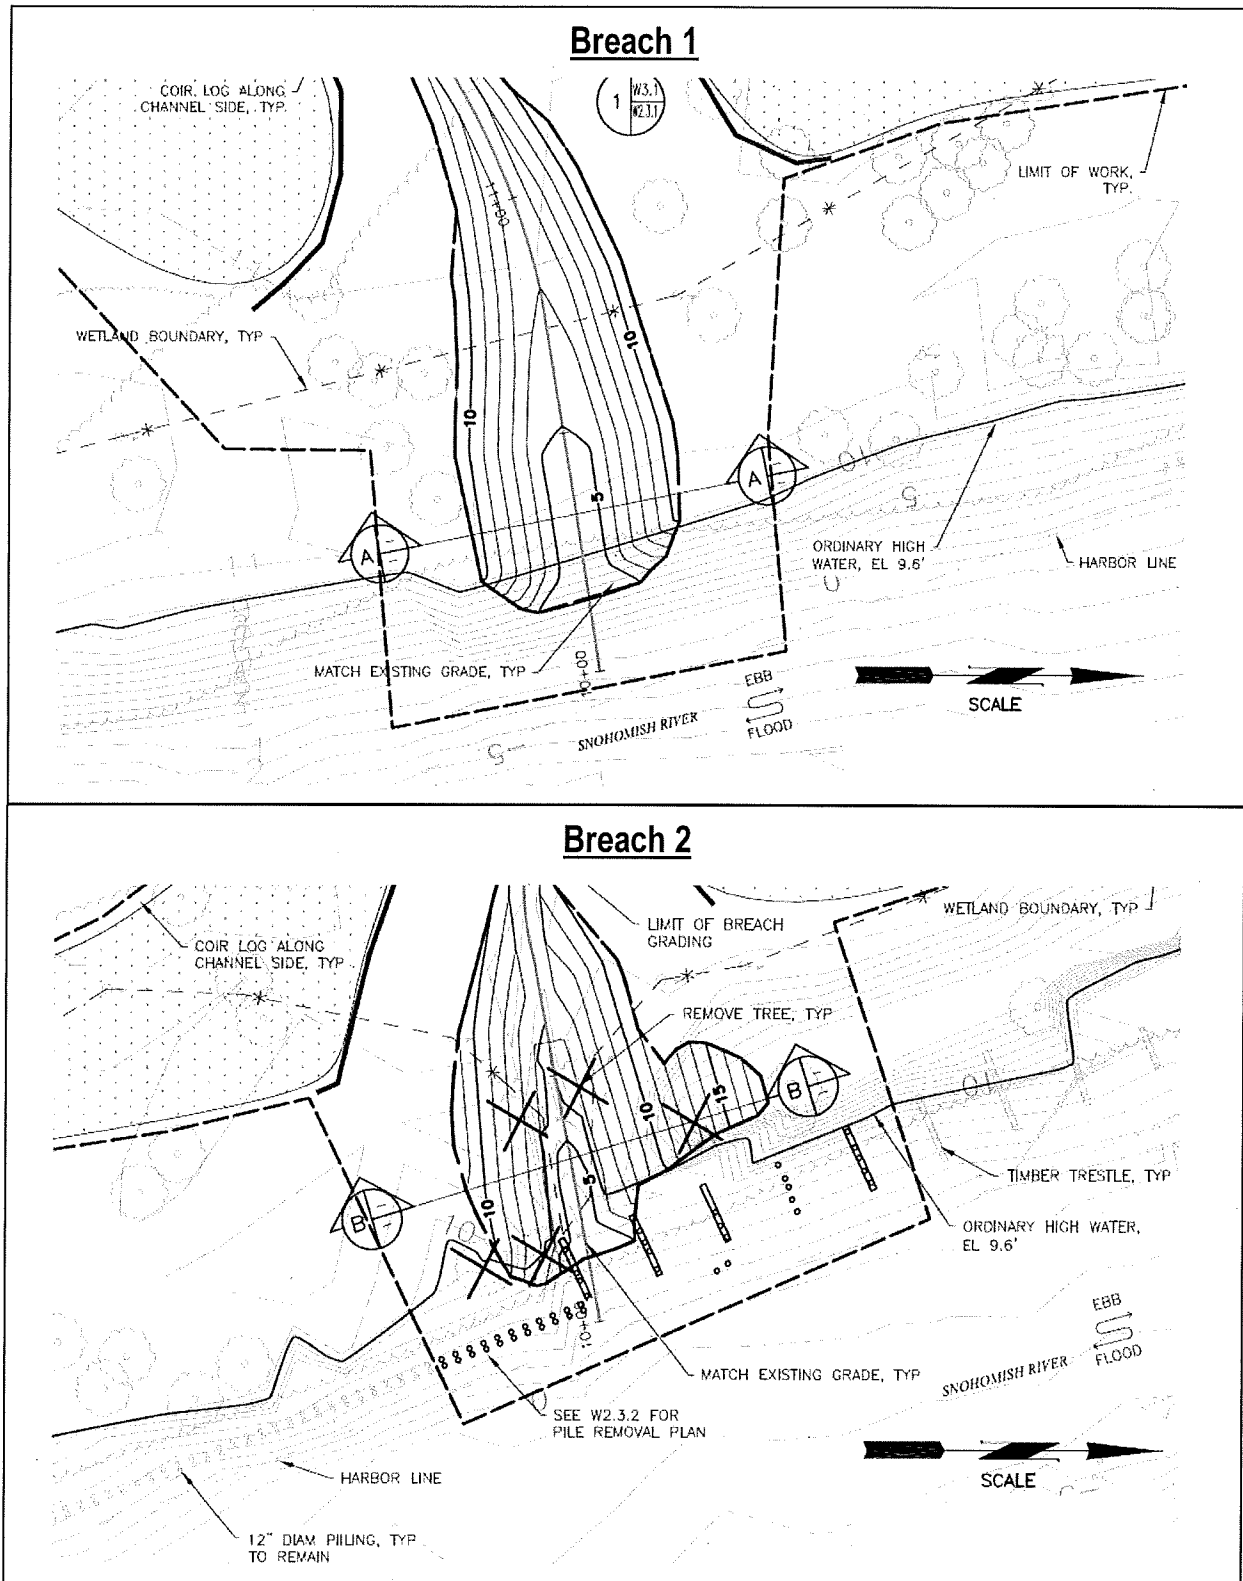

Licensee has submitted Attachments 1 and 2 to this Exhibit B. State grants its consent to this Work, except that Licensee shall conform all Work to all other requirements of Section 5 of this License.

2. ADDITIONAL OBLIGATIONS

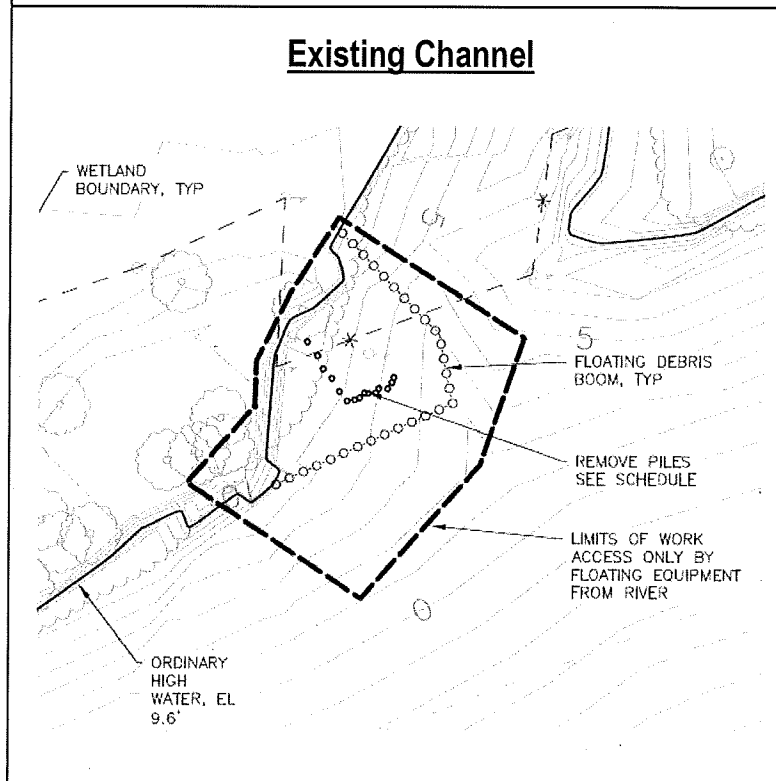

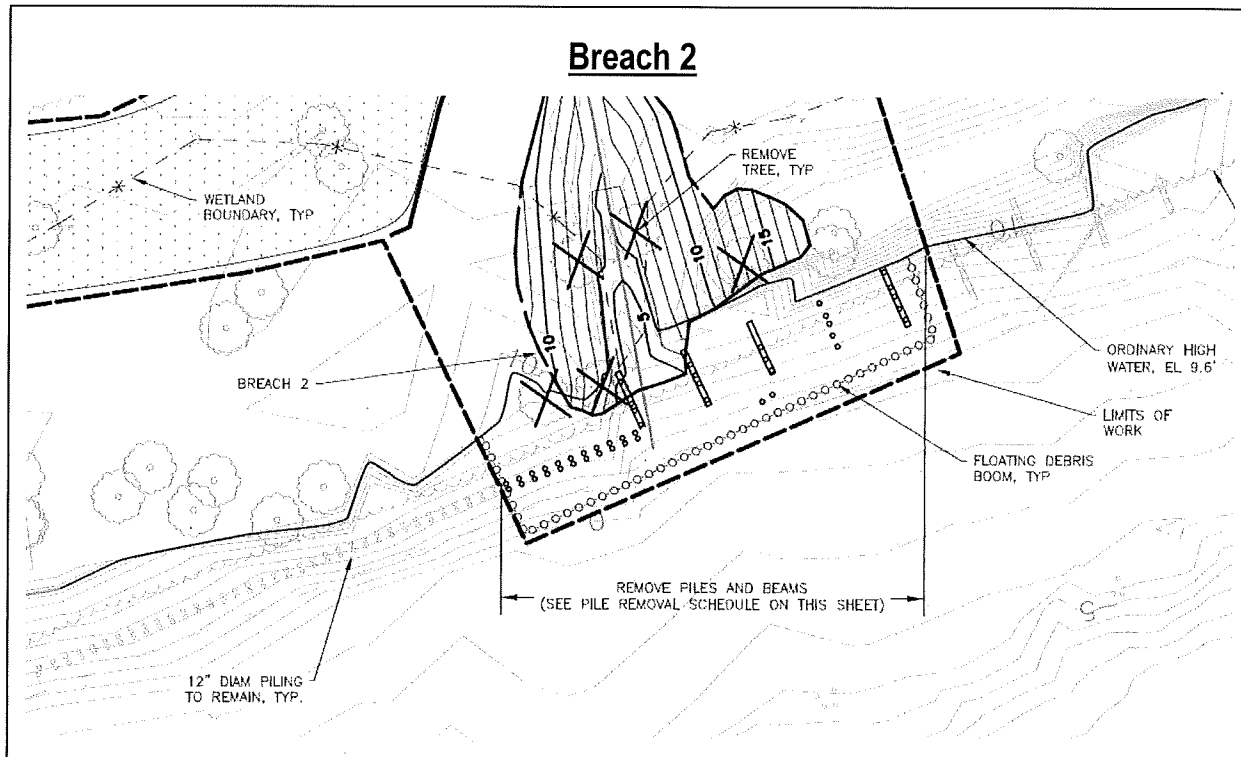

- A.** Licensee shall remove all creosote-treated pilings and beams depicted in Attachments 1 and 2 to this Exhibit B. Removal must be complete by June 14, 2017.
